Herbal/Natural Medicines

A Company Manufacturing

**Quality Assured and Effective Unani
Medicine**

Since 1952

We adopt improved manufacturing practices that are inline with global manufacturing standards and natural products requirements with team of highly qualified and trained technologists who are backed with refined manufacturing culture.

We are proud to be a well known Unani brand name of India having speciliazation in blending traditional Unani Science for formulation and development of Unani/Herbal Medicine to counter health related challenges of modern life style and the chronic ailments.

A WORD ABOUT US

Dawakhana was established in 1954 under the patronage of Aligarh Muslim University Aligarh on a very small scale as the Dispensary of **Ajmal Khan Tibbiya College Hospital** with the precise objectives of strengthening the Unani System of Medicines in India by providing quality assured effective Unani medicines which were on gradual decline at that time. It was started with meager financial back up, it gradually flourished and transformed into full fledged commercial organization. These were the ideas and thought of great visionary former President of India Janab Zakir Hussain under his stewardship as a Vice-Chancellor, Aligarh Muslim University (1948-1956) Dawakhana was established.

Our manufacturing technique is a blend of the modern technology and the ancient processes of extraction to retain the maximum characteristics of each ingredient.

Though Dawakhana has grown to large extent but the primary objective remains the main concern for which Dawakhana was established. A team of more than 200 junior and senior workers here at Aligarh under the guidance of Dawakhana Management is selflessly busy in the service of mankind.

A specific remedy of Syphilis and Gonorrhoea It is also indicated in Rheumatism and Gout with gratifying results. A highly beneficial medicine for venereal diseases and ailments.

I Capsule to be swallowed and never chewed

Use of ghee and butter in diet is greatly helpful and profitable

11. MEN'S HEALTH & SEXUAL DEBILITY AND DISORDERS

PHYSICAL DEFORMITIES FUNCTIONAL DISABILITIES AND SEMINAL COMPLAINTS

Vast explanation in this section as other are lacking in details?

These special diseases to which young men are generally subjected are almost confined to their genital organs bringing about deformities of the organ and senile complaints i.e., premature senility, sensitiveness of the prostate glands, night pollution, sexual debility, partial or total loss of sex desire.

Of course, these complaints and disorders are not serious enough to require hospitalization, but are serious enough, to require treatment, as they are always attended by mental and physical exhaustion, specially arising from sexual neurasthenia, excessive mental exertion and depressive mental condition due to senile apathy or sexual debility. Decrepitude, weariness, general lassitude and languor arising from premature senility.

If unattended, all these conditions are likely to persist in varying degree and intensity, until the health is irremediably damaged.

To eradicate this dreaded group of wasting and debilitating diseases, which have ravaged mankind since antiquity, a course of treatment has been stated. We rightly hope, young and old alike, will

greatly be benefitted by having a rapid and permanent cure of the physical deformities of the organ, functional debility and seminal disorders.

The course of this treatment comprises of five medicines-

1. Zimad-e-Muqawwi (For external use)
2. Dawa-e-Tikore (for external use)
3. Tila-e-Benazir (For external use)
4. Majun Arad Khurma (For oral use)
5. Kushta Qalai (For oral use)

FIRST STAGE –Zimad-e-Muqawwi (paste)

Before commencing the actual treatment the deformed and weakened male organ has to be prepared to make the course of the treatment effective and fruitful.

The paste has to be warmed a little and the organ should be rubbed gently for a week, once in the night. It has a selective action on the organ and its adjacent, enabling it to receive further treatment.

SECOND STAGE-Dawa-e-Tikore

Rough handling in masturbation for a long period impoverishes the nerves, tissues and weakens their functional power, bringing about stiffness conjunctions and loss of elasticity. This adversely affects the

circulation of the blood attended by partial or total absence of sexual desire.

To rectify these ills, fomentation by Dawa-e-Tikore should be employed with gratifying results. The fomentation promotes free circulation of the blood in the arteries and veins of the organ, improves functional power and activates sexual desires.

10 gms Dawa-e-Tikore tied in a piece of cloth should be dipped in warm linseed oil and the organ be fomented gently once in the night for next full one week.

THIRD STAGE-Tila-e-Benazir

The action of the treatment has to be reinforced and has to be made more intensified by the application of the Tila-e-Benazir on the organ at the commencement of the third week.

This Tila is unique in burnishing, sharpening and overhauling whole of the organ mechanism. It works readily and effectively in reviving the functional power to a high level by curing permanently the dead tissues, nerves and arteries and providing rich blood through renewed circulation. The action of the Tila on the organ does not stop here, but it also removes the physical deformities viz., smallness, thinness and the curvature.

Thus the action of the paste and Dawa-e-Tikore is complete bringing about permanent cure of the deformities and the functional power after the application of the Tila in the Third Stage.

N.B. – Direction regarding application of Tila-e-Benazir is available along with the phial.

The treatment in these three stage cures the physical, deformities and improves the functional power of the organ. But the seminal debility and sexual insufficiency has still got to be cured and removed.

Majun Arad Khurma mixed with Khusta Qalai is an ideal combination for curing premature senility, sensitiveness of the sexual desire, nocturnal emissions and other such seminal complaints. This medicine exerts its action in curing the senile apathy and acts as an important auxiliary for combination with the line of treatment indicated above to enhance and deepen its action by proving a soothing and curing effect on the system.

10 gm. Majun Arad Khurma with 4 Rice weight [60 mg.] of Kushta Qulai should be taken once in the morning with fresh water from the very first day of the treatment in the first Stage.

Shababi

Shababi is a marvelous preparation is a marvellous preparation of costly, selected and efficacious medicines of a high potency. It is a favoured remedy of sexual weakness and general debility. It is not only helpful in restoring lost youth with all its attributes, but it is also highly stimulating and invigorating. Shababi 3 to 5 gm, when taken with 60 ml. of maul Laham khas has in unexcelled effect because of its unique advantage, it has a wide range of usefulness.

Luboor Kabir Khas

It is an excellent preparation of precious ingredients and other health-giving matter, being specific for sexual debility. It removes general lassitude and languor arising from premature senility. By enriching fluid and invigorating the genital glands, it increases sexual desire and repairs the ills of the sexual excess. Restores energy, vitality and health.

When Luboob Kabir Khas 5 gms. is taken with Maul Laham Khas 60 ml. once in the morning, it is highly efficacious and beneficial.

Majun Nishat Angez

Thinness of seminal fluid, premature senility, involuntary desire flow, lassitude of the male organ, lack of sexual desire are rampant these days and mostly common with young people.

This Majum fulfils the long-felt desire of young people who have lost their youth with all its attributes. It thickens the seminal fluid by improving the function of the testes and prostate glands, thereby stops premature senility.

Activates and stimulates sex desire and removes weakness of the genital organs. Being an excellent tonic for sexual disabilities, it restores and preserves manhood.

3 to 5 gms, at a time

Habbe Nishat Jadid

This Pill is” Loves stimualant” prepared from Saffron and precious stones to promote energy and vitality to genital organism and to active sexual function.

It is specific for removing sexual disorders, weakness and debility virtually those suffering from sexual disabilities may be treated very successfully with these pills.

Habbe Nishat Jadid is not only excellent in its health-preserving and life-giving properties by improving the functions of the kidneys and ductless glands specially the seminal ones but by toning up the prostate glands and testes, it stops high sensitiveness and cures premature senility, removes thinness of the fluid, activates and stimulates sexual desire.

This pill is highly beneficial in curing senile apathy and sexual debility. 1 Pill both morning and evening with milk.
